index.html

Design concepts, look at other sites,
a11y, SEO, animations, linear
gradients, responsiveness
(breakpoints and viewports), avoid
dummy text: content with sense and
meaning, implement API, try to fetch

GOALS: reference to Assignment instructions. Structure of directories and files. Decent and consistent design and presentation. Responsive design performing in different viewports. Document every process of the project. Credit when the content is from outer source. TRANSITIONS & TRANSFORMS, SASS or SCSS, ability with modules, variable and structuring in different environments: coding, files organization. Level your skills right to the next level
